

**2009 Cessna T182T Turbo Skylane N5139W with Garmin Synthetic Vision
Price: \$427,400**

The 2009 Cessna Turbo Skylane, with its 235 h.p. powerplant, carries full-rated power all the way to a maximum operating altitude of 20,000 feet. There you'll cruise the clear, smooth air at speeds up to 176 knots (203 mph). Yet even with such breathtaking performance, you'll still breathe easy with a standard four-place oxygen system, not to mention the added safety of a heated propeller and the enhanced situational awareness of the Garmin G1000 Flight Deck.

AIRCRAFT PERFORMANCE / WEIGHT STATISTICS:

- Maximum Cruise176 kts.
- Normal Cruise Speed (75% power).....145 kts.
- Stall Speed (flaps down)..... 49 kts.
- Gross Weight (take-off).....3100 lbs.
- Useful Load..... 994 lbs.
- Payload w/ 87 gal. (522 lbs.)..... 472 lbs.
- Payload w/ 64 gal. (384 lbs.)..... 610 lbs.
- Endurance w/ 87 gal. (45 min. Reserve). 6.2 hours
- Endurance w/ 64 gal. (45 min. Reserve)... 4.2 hours
- Range (45 min. reserve)..... 900 nm.

AVIONICS:

- Garmin G1000 Integrated Avionics Suite

Fully integrated EFIS System presented on two 10.4" high resolution XGA displays (PFD/MFD) - Attitude Heading Reference System ("AHRS") - Solid State Air Data Computer ("ADC") - Solid State 3-axis Magnetometer - Engine/Airframe Indication & Crew Alerting System ("EICAS") - Dual NAV/COM (16 Watt) - Dual IFR Enroute/Approach Certified & WAAS enabled GPS - Fully Integrated Mode S Transponder - Digital Audio Panel - Traffic Information System ("TIS"), Terrain (Topographic & Relative) - XM Satellite Weather & Radio Receiver - WX 500 Stormscope System - GFC 700 2-axis Integrated Flight Control System - Backup Airspeed, Attitude & Altimeter - Standby Battery. Garmin Synthetic Vision Technology.
